1 Download This File

Save this page as **index.html** on your computer. That is your entire website — one file, zero setup needed.

Cost: $0

2 Create Free GitHub Account

Go to **github.com** → Sign up free → Create repository named exactly: **yourusername.github.io** → Upload your index.html file.

Cost: $0 · Domain: yourusername.github.io

3 Enable GitHub Pages

In your repo: Settings → Pages → Source: Deploy from branch → main → Save. Wait 2 minutes. Your site is **LIVE**.

Cost: $0 · Live in 2 minutes

4 OR Use Vercel (Better)

Go to **vercel.com** → Sign up free → Connect GitHub repo → Deploy. Your site goes live at **yourproject.vercel.app** — looks more professional.

Cost: $0 · More professional URL

5 Apply for Google AdSense

Go to **adsense.google.com** → Sign up → Add your site URL → Wait for approval (1–2 weeks). Paste their code into your HTML and start earning from every visitor.

Cost: $0 · Earn after approval

6 Share in Afghan Communities
